US, EUROPE AND ASIAN UNIVERSITIES HIGHER EDUCATION GLOBAL STANDARDS!

Modifications in worldwide higher education systems are taking place because of technological progress and new economic forces plus changing industry specifications. Schools all over the world update their educational programs and methods to train students who can perform well in today's work environment. These study global modifications in USA, Europe, and Asia college systems before showing how India can outmatch competitors through its educational updates.

Universities across America focus their resources on technology and data science majors. According to the National Centre for Education Statistics total enrolment in Computer and Information Sciences and Support Services doubled from 2009 to 2019. These institutions demonstrate their eagerness to develop tech-skilled professionals who bring value to healthcare, financial services, and manufacturing industries.

European learning establishments have begun to follow new ways of teaching. Multiple European nations work together in the Bologna Process to create common European Higher Education Area (EHEA). By allowing students to move from study to work and back they gain better employment

opportunities throughout their lives. Universities add green skills and sustainable practices to their educational plans because climate change and environmental concerns now influence academic content.

Asia is showing progress in education as China and Singapore work to improve their systems. China has launched Double First-Class to establish international research and education quality standards at its universities. Singapore prepares for future needs by prioritizing continuous learning opportunities for people at all ages. The system supports learners in developing and upgrading their skills to meet new business field standards. University academic programs need to change their learning methods to match modern industry changes.

New technologies drive changes in business structures while generating needs for employees who can handle AI programming and data analysis. Organizations look to hire graduates who understand technology and nursing innovation together with expertise in growing their business operations. University students should learn digital skills, solve workplace issues and develop entrepreneurial thinking to prepare them for industry requirements.

As an accomplished education specialist Mr. Nitin Mule who runs his online overseas education consultancy has researched the worldwide developments. He reveals that international schools now teach advanced tech subjects like block chain, artificial intelligence, and cyber protection.

Mr. Shekar AVAC Prashas Education Consultants with 20+ years of experience said, Students who opt for traditional degrees don't receive better jobs. Students choosing subjects about market shifts gain better career opportunities. India must change its higher education system to match current worldwide learning methods in order to stay effective.

THE INSPIRATIONAL MATH TEACHER TRANSFORMING STUDENTS' LIVES

DR. PERAM RAMAIAH, M.SC.,B.ED

The name Dr. Peram Ramaiah is a byword for excellence in mathematics education at Mahesh Vidya Bhavan School in Shivarampally, Hyderabad, India. Dr. Ramaiah has more than eighteen years of experience, and he has transformed difficult mathematical ideas into approachable and entertaining learning experiences. Dr. Ramaiah, with an M.Sc., B.Ed. is not only an accomplished math

teacher but also a source of motivation for his pupils.

Students can now approach mathematics with confidence and excitement thanks to his creative teaching strategies, which include a variety of shortcuts and techniques. His students have regularly achieved outstanding academic results as a result of this innovative approach; many have even received the highest exam scores.

Connecting to Subject

Dr. Ramaiah is not only an excellent teacher but also a certified student counsellor. His ability to provide counselling has been crucial in reducing the anxiety that is frequently connected to math and creating a caring and encouraging learning environment. This all-encompassing method not only raises students' academic achievement but also improves their general wellbeing.

The influence of Dr. Ramaiah's instruction goes well beyond the confines of the classroom. The

former pupils, who are currently enrolled in esteemed universities overseas, still have pleasant memories of his instruction. His impact has had a lasting impact on their academic careers and is frequently cited as a key factor in their achievement.

Recently, Deepa, an eighth-grader from a state school and one of Dr. Ramaiah's students, shared her experience. She remarked, I finished my 10th state board math exam very confidently. The only reason for this is my math teacher, Ramaiah Sir. The sentiments expressed by her are echoed by numerous students who have had the honour of learning under Dr. Ramaiah tutelage.

Dedication to Teaching

Dr. Ramaiah, In addition to raising students grades, Ramaiah's dedication to making mathematics interesting and enjoyable has given them a lifelong love for the subject. Every lesson he teaches demonstrates his commitment to teaching and his student's

success, making him a valued teacher of the Mahesh Vidya Bhavan School community.

Dr. Ramaiah's skills are expanding as he inspires and teaches, demonstrating that all students can succeed in mathematics given the correct direction and method. His tale illuminates the way to academic achievement and personal development for innumerable students, serving as a reminder of the enormous influence a dedicated educator can have.

Kids Bed Time Story

BENNY BUNNY AND FREDDY FROG HEALTH SECRETS?

Benny Bunny and Freddy Frog enjoyed their friendship deep in the green forest as close friends. The two friends regularly appeared together as they explored the woods doing activities and shared food. They showed contrasting eating habits. Benny took pleasure in nutritious diet choices while Freddy preferred unhealthy snacks.

The food temptations defeated Freddy Frog's self-control. He developed a strong craving for pizzas burgers chips and candy because picnickers often left these foods in the forest. Benny consistently ate natural carrots lettuce and berries from his meals but Freddy liked eating junk meals. Freddy slowly put on more body weight.

His light graceful jumps evolved into laborious jumping motions but he could not match Benny's marching pace anymore. Due to his size growth Freddy faced difficulties filling into his preferred bus seats because they now seemed too small for him. The simple hill climb he used to do seamlessly became too tough for Freddy to manage. After finishing a brief race Benny saw Freddy had difficulty breathing.

The sight of Freddy slowing down concerned Benny so he sought time to talk with him about his food choices. During your tough game and activities Benny stepped forward to address your weight issue. You look uneasy while taking the bus and now struggle with the hill you enjoyed climbing. Do you think your unhealthy eating choices in junk food impact your physical abilities? Freddy responded with a slight move of his shoulders while saying "Benny the snacks really taste good". Benny recognized the situation his friend was facing. You enjoy the flavor but your body stays unhealthy because of poor dietary choices. Junk food exists with its name to describe its harmful effects. These unhealthy foods lead directly to weight gain and fatigue plus serious medical conditions. Eating more fresh fruits vegetables and grains brings superior taste benefits to your health. The foods are not just tasty but also help you stay in shape. Benny's honest request made Freddy accept his suggestions.

Freddy worked with Benny to begin consuming a better diet plan. The team secured Mrs. Squirrel to design a healthy eating program including healthful and tasty food choices. Freddy learned through experience that plant-based foods taste better than unhealthy junk snacks. After some time Freddy noticed improvements. The change in his weight and stamina made him feel faster as he bounced across the woods with Benny again. Both the bus seats and his favorite hill felt easy to access and he found a perfect fit in his new wardrobe.

EMPOWERING THE FUTURE

PRINCIPAL A. MANIDEEPTHI'S VISION FOR RURAL GIRLS' EDUCATION!

Preparing rural Background Students

In the heart of Peddapalli, Telangana, a remarkable transformation in education is taking place under the guidance of Principal A. Manideepthi at the Girls School and Junior College. As a Principal Grade 1, she has dedicated herself to enhancing the educational experience of students from rural backgrounds, equipping them with the skills needed to thrive in today's competitive world.

Principal Manideepthi's approach is both innovative and compassionate. Understanding the unique challenges faced by students from rural areas, she has

implemented a range of programs designed to bridge the gap between traditional education and modern demands. Her efforts focus on fostering a learning environment that is both inclusive and forward-thinking.

Technology Trainings

One of the key initiatives introduced by Principal Manideepthi is the integration of technology into the classroom. Recognizing the digital divide that often hinders rural students, she has worked to ensure that students have knowledge on present technology advancement and the internet. This not only aids in their academic pursuits but also prepares them for a world where digital literacy is indispensable.

Improving Soft Skills

Moreover, Principal Manideepthi emphasizes the importance of soft skills alongside academic excellence. She has organized workshops on communication, leadership, and critical thinking, encouraging students to develop

these vital skills. By inviting professionals from various fields to speak and interact with students, she provides them with valuable insights into the opportunities and challenges of different careers.

Extracurricular activities also play a prominent role in her educational strategy. From debates and cultural events to science fairs and sports competitions, students are encouraged to explore their interests and talents. This holistic approach not only boosts their confidence but also instils a sense of responsibility and teamwork.

Preparing Students for Modern World

Principal Manideepthi's efforts have not gone unnoticed. She even received best principal award from minister of state government. The school has seen a significant improvement in academic performance, and students are increasingly participating and excelling in state-level competitions. Parents

and community members have praised her dedication and vision, acknowledging the positive impact she has had on the future prospects of their children.

In a region where educational resources are often limited, Principal A. Manideepthi stands as a beacon of hope and progress. Her commitment to uplifting rural students and preparing them for the challenges of the modern world is a testament to the power of education. Through her leadership, the Girls School and Junior College in Peddapalli is not just a place of learning, but a launching pad for dreams and aspirations.

LEADING EXCELLENCE IN EDUCATION: DR. PM YOHAN, NATIONAL PRINCIPAL OF THE YEAR '24!

This award is a remarkable development in appreciation and acknowledgement of excellent performance in the educational leadership, Dr. PM Yohan has been awarded National Principal of the Year 2024 for Wesley Engineering College at Secunderabad.

In particular, Dr. Yohan has a master's degree in Computer Applications, M. Tech., MBA and Ph. D. degree holder with more than twenty five years of teaching experience, with unique passion to nurture the environment with instructions and creativity. It is for this reason that Dr. Johans influence is not confined to his institution since he has been helping scholars who are working towards their PhDs.

His leadership has assisted each learner to effectively and efficiently realize his or her

academic potential as well as to improve the respective fields. He is well published and his papers have been cited on Google Scholar, for proving that devoted educators play a great role in the success of the educational institution, as well as the furtherance of the education business. This added up to his publication list of journal articles presented in both national and international conferences and journals to reflect his areas of specialization in Data Mining, Artificial Intelligence, Data Science, and Machine Learning and other related areas.

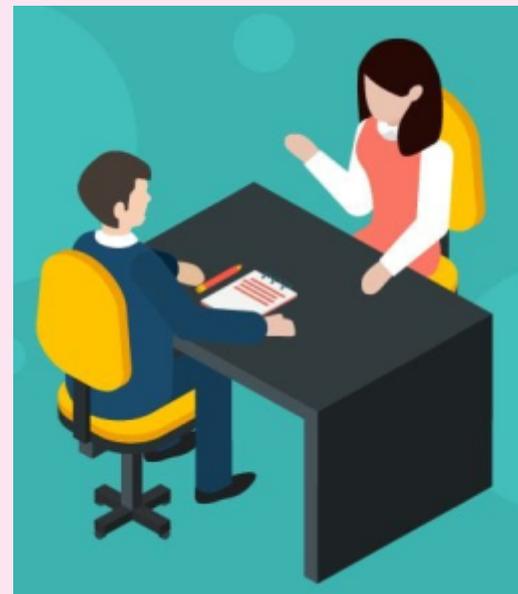

As a member of national professional bodies such as the MIST and the Common wealth of Science and Industrial Research organization, Dr. Yohan gets updated himself with the latest trends of using technology in education. Also, Dr. Yohans is active in organizing virtual conferences around the world and conducting workshops and seminars for the development of staff. They have benefited not only the faculty members but also the students given that teaching-learning process is boosted through innovative and effective pedagogy

practices.

From the students' perspective, the polices are well-set and regulated by Dr. Yohan in the Wesley Engineering College where students have excelled in their academics. His administration guarantees that academic standards meet all the requirements set by the government authorities and, at the same time, makes every student feel welcome and enveloped in compassion. These are, by all means, significant; Dr. PM Yohan enlightens people with knowledge beyond black and white texts, which are the fundamentals for surviving in today's society.

The culture that he propagates involves cooperation among students as well as the development of talents within them. Dr. PM Yohans passion for education is evident and this shows that he is a positive change professor of the college. These are not individual achievements for self-gain but for the improvement of his students who wish to be inspired by his passion for excellence will surely take this with them in their respective careers in the constantly advancing world spearheaded by technology.

DON'T IGNORE: STUDENT COUNSELLORS BENEFIT STUDENTS & SCHOOL?

School psychologists known as student counsellors help students grow and learn both in their studies and in their social life by supporting their mental well-being. Though these staff members work hard they regularly receive insufficient recognition by schools.

The school system performs worse when student counsellors get ignored because it damages both learning results and students' mental health. This research looks at how schools suffer when they ignore student counsellors and shows how such professionals benefit education while improving school standing. Student counsellor professionals serve as the main supporting figures for students who have trouble with their classes.

Student counsellors find and address mental health concerns as well as educational and family problems that affect every student's school performance. A school counsellor helps students see issues that make them perform poorly in high grades and reduces focus plus lowers their drive to succeed along with weakening their self-worth. Students may lose their commitment to learning when their motivation shifts away from development and turns toward seeing education as too hard to overcome. Through counselling students know their abilities and problems so they can improve themselves. Student counsellors show students how to set realistic targets while helping them choose their best educational and professional paths. Students find a secure atmosphere to share their emotions through sessions

**DR. SK ALTHAF HUSSAIN BASHA - NATIONAL PRINCIPAL YEAR OF THE AWARD'24
WINNER PIONEERING EXCELLENCE IN ENGINEERING EDUCATION**

Dr. SK Althaf Hussain Basha has been holding the position of Principle at Rishi MS Institute of Engineering and Technology for Women in Hyderabad as a dedicated and renowned scholar in the field of computer science. Dr. Basha acquired an M. Sc., M. Tech., and Ph. D. in Computer Science and in the course of his work experience has focused on nurturing technological skills among students and readiness of the students to embrace the dynamic nature of the field of technology.

His contribution in the field of academic is evident in that Dr. Basha has presented more than ninety six papers which have received recognition through Professional bodies at the international and national level in conferences and journals. Still, his expertise is clear in his scholarly works and further evidenced by his ability to perform the tasks of a reviewer in the following journals like JIKM, IJGUC, IJEDR, JETIR, IJCRT, BPJ, JARHE and IRE present journals.

All these activities are in line with his goal and desire to uphold the highest professionalism within the academic fraternity. Beside, Dr. Basha has received 64 Google Scholar citations and

worked for a Minor Research Project under the grant given by UGC-MRP. It does not stop at being an author; he has also been engaged in management of numerous international conferences and also management of workshops and staff development programs meant to support the improvement of educational practice.

Membership in various professional bodies like CSI, ICFER, IET, IACSIT, CSTA, FSF, IAENG, EAI, SDIWC, TERA, and IEEE also show his interest to develop the technology education. His main areas of interest include Data Mining & Data Warehousing, AI & DS, ML & ANNs & Fuzzy, & DBMS. It enables him to be a good advisor to his students especially in all their academic endeavours.

As one serving in the advisory committee for several prestigious conferences and journal and as an editor of several international journals currently, Dr. Basha has a great responsibility for determining the future trajectory of research within computer science fields. He has the added advantage of having one year industrial experience coupled with 24 years of teaching experience for guiding two PhD. scholars while supervising another two—he acts as a scholar who is genuinely committed to do all one could to make a student

succeed.

Certified as a student counsellor and career coach, many students have been placed during campus interviews in various organizations due to the assistance of Dr. Basha. Therefore, Dr. SK Althaf Hussain Basha can be regarded as an educator who is not only devoted to teaching but also preparing students for the future as would-be innovative technocrats who require apposite technological tools for competing in the future world.

Dr. SK Althaf Hussain Basha exemplifies what it means to be an educator committed not just to imparting knowledge but also nurturing future innovators equipped with essential technological skills necessary for tomorrow's challenges. His unwavering dedication ensures that students at Rishi MS Institute are not merely passive learners but active participants ready to make impactful contributions across various sectors within technology—a true testament to the power of effective leadership in education.

**DON'T IGNORE: STUDENT
COUNSELLORS BENEFIT
STUDENTS & SCHOOL?**

with a counsellor. Counsellors show students effective ways to handle their emotional struggles that affect their ability to study and develop as individuals.

Through support and guidance, counsellors teach students how to connect positively with both their classmates and teachers. Better connections between school members work best to create a helpful environment. A trained counsellor helps students manage their stress levels while preventing wrong behaviour and suicidal thoughts.

The school setting creates many difficulties because students manage academic stress alongside peer challenges while dealing with their personal problems which result in behavioural problems and may also produce suicidal thoughts. Professional counsellors detect early problems in students and help them through recommended activities. Certified counsellors guide students through their challenges by showing them how to manage stress better and create good behaviour while helping those who think about suicide.

Qualified student counsellors help schools improve their reputation through their services. The presence of certified student counsellors directly improves how schools appear to parents and other stakeholders. Parents should select educational institutions that focus equally on learning results and emotional support for their children.

Student counsellors help students achieve their academic goals while helping them grow as individuals and building emotional resilience plus social abilities. Not employing student counsellor's fulltime affects students both in their studies and mental health development. Schools must prioritize student counsellors because they benefit their students while improving school reputation.

Support and care lead students to better academic results which make the school perform better. A school's popularity depends on its results in education plus how well it develops students in all aspects of life including their emotional state. Schools need student counsellors more than anything else to help students succeed.

NAVIGATING YOUR CAREER PATH

TIPS FOR ASPIRING PARAMEDICS AND HEALTHCARE PROFESSIONALS

It is always a challenge when venturing through a selected career especially for anyone interested in joining or already working as a paramedic or any related field in the healthcare sector. It goes without saying that the healthcare industry is no longer static; therefore there needs to be a provision of relevant tools or knowledge for success in this industry. Below are some important guidelines with regard to how people can begin on building a career path to this profession of paramedic and other related field. To begin with, there is dire need for seeking general career counselling for the paramedical students. This nonetheless can assist you in determining your areas of interest in healthcare facility because you first get to know some of the positions existing in this industry.

Paramedicine is a challenging field that combines elements of the emergency services, nursing and problem-solving abilities that are highly useful in fast-moving scenarios. This is because, before enrolling in a specific specialization, courses on EMT, advanced EMT or paramedic will help the students to make an

informed decision. This is definitely a fundamental aspect as far as opportunities in healthcare field are concerned.

Such contacts increase awareness of the fact that no textbook will ever be able to teach what one learns when interacting with experienced industry practitioners. It is recommended to attend conferences and workshops in your local emergency medical service areas or health-related fairs where there are likely to come across experienced professionals who can guide you throughout this process. There are some local EMS associations which provide important tools like the employment site and workshops for paramedics.

Education and training are continued being able for the paramedics as an important aspect of career enhancement. The field of medicine is one of the industries that are constantly evolving due to constant development of various procedures and techniques; it's crucial to keep receiving new training. Most states have got continuing education hours that practitioners need to complete to be certified again; nonetheless, extra hours of continuing education can be an added advantage when it comes to competition in job offers or promotion. Other pertinent factors that augur well for employment include certifications and each and every specialization.

However, these include broad certifications such as CPR and First Aid certifications; the ACLS or PALS indicate the nurse mistake towards quality services to the

patients. Besides, focusing on certain specialties like tactical medicine or critical care transport also provides you with exposure to other job opportunities which might interest you. The last advice that can be given to those who enter this profession is to never overlook the importance of soft skills. Important task, which is done within working process, is communication and understanding of patient and his family, as well as effective cooperation with other workers.

Volunteering or internship is a good way to develop such skills as well as to get practical experience which provides benefits when one is searching for a job. Finding one's way around the career—preparation as a potential paramedic means both careful planning and love of humanity's medical needs while they are in critical conditions.

By getting career counselling before you start your journey, building your connection within health care industry, deciding to gain more knowledge about the field through certification and proper specialization, as well as focusing on the aspects of interpersonal skills you'll be ready not only enter the chosen sphere but also to succeed in it.

CCRUM & NATIONAL INSTITUTE OF UNANI MEDICINE TO PROMOTE RESEARCH IN UNANI SYSTEM

Ministry of Ayush is taking multiple initiatives for integration of Ayush systems, including Unani with modern medicine

To promote research in Unani system of medicine, Ministry of Ayush, Government of India has set up the Central Council of Research in Unani Medicine (CCRUM), New Delhi and National Institute of Unani Medicine (NIUM), Bengaluru, for education and research in Unani system of medicine which includes development of new drugs as well as conducting clinical trials on scientific lines.

A satellite institute of National Institute of Unani Medicine with a 200-bedded hospital is also established at Ghaziabad, Uttar Pradesh. A total number of 21 Clinical Institutes/Units are also working under the CCRUM across the country. Both CCRUM and NIUM have taken up a number of clinical research studies for various diseases which include Arthritis, Bronchial Asthma, Anemia, Anxiety, Depressive Disorders, Neuro-degenerative diseases, life-style disorders like Hypertension, Obesity dyslipidemia, diabetes and various skin diseases like vitiligo etc.
